

EUROPEAN COURSE ON THE PATHOLOGY OF LABORATORY ANIMALS

Organized by The D.E.S.V. of Veterinary Pathology
& The C.L. Davis Foundation

In partnership with:

The French Society of Veterinary Pathology
INSTITUT PASTEUR - PARIS (FRANCE)
APRIL 20-24, 2009

EuroPOLA-2009 SPEAKER INFORMATION

In order to help speakers to prepare their presentation and meet the needs of the audience at EuroPOLA-2009, here is some important information:

- The audience of this course will be mainly laboratory animal vets and veterinary pathologists with working experience in the industry and research institutes from Europe (although colleagues from the USA, Canada, India, Japan sometime show up). EuroPOLA is also attended by **residents in Veterinary Pathology or Laboratory Animal Medicine** preparing for ECVP or ECLAM certifications.
- The number of attendees will be limited to about 100 participants.
- We would appreciate an **electronic copy of your presentation material (PPT/PDFs etc) at least 2 months prior to the course** (March 15th , 2009 at the latest) - This is necessary as we deliver a booklet of handouts to participants.
- The **DESV in Veterinary Pathology** and the **CL-Davis Foundation** being **non-profit organizations** dedicated to continuing education, the organizers will appreciate if your company or institution could directly offset your travel cost expenses. By doing this, your company or institution will become a course sponsor and advertised with a sponsorship level commensurate with the financial contribution. However, if this is not possible, the organizers will take care of all your travel expenses (Please keep all your tickets and receipts).

General information about this meeting and about previous meetings of this series is available online at <http://www.europola.com>

Should you need more details, please do not hesitate to call or email me.

I am looking forward to hear you at this meeting!
